## Product Description

### Product Overview

Step up your toolkit with the Zava Torque Wrench 1/2-drive, the ultimate choice for professionals and serious DIY enthusiasts alike. Designed to deliver unmatched precision, this torque wrench is more than just a tool—it's a testament to superior craftsmanship and innovative engineering. Whether you are assembling delicate machinery, tightening automotive bolts, or tackling demanding home improvement projects, the Zava Torque Wrench ensures that every fastener is tightened to perfection. This product stands out in a crowded market by blending cutting-edge technology with robust, user-focused design, making it essential for anyone who values reliability and control in their work.

### Superior Engineering

At the heart of the Zava Torque Wrench is a patented micro-adjustment mechanism, allowing for ultra-fine torque settings with increments as low as 0.2 Nm—unparalleled accuracy in its class. The wrench is constructed from heat-treated, aerospace-grade chrome vanadium steel, ensuring exceptional durability and resistance to corrosion. Each component is CNC-machined for a flawless fit, while the internally sealed ratchet head guarantees consistent,

smooth operation even in the harshest environments. With Zava's proprietary Dual-Lock Calibration System, users can easily recalibrate the wrench on the fly, maintaining factory-level accuracy over years of demanding use.

## **Professional Performance**

Engineered for professionals, the Zava Torque Wrench delivers a wide torque range from 10 Nm up to 250 Nm, making it suitable for everything from precision bicycle repairs to heavy-duty automotive work. The exclusive anti-slip, dual-material handle combines thermoplastic elastomer and knurled steel, offering unparalleled grip and comfort during extended use. The wrench features a clear, laser-etched scale for fast, error-free adjustments, while the integrated click-feedback mechanism provides unmistakable tactile and audible signals when the desired torque is reached, eliminating the risk of under- or over-tightening. With its lightweight yet robust profile, this tool reduces user fatigue and maximizes productivity in every application.

## **What Sets Us Apart**

The Zava Torque Wrench is not just another tool—it's a leap forward in hand tool innovation. Unlike conventional torque wrenches, Zava integrates an exclusive Quick-Release Lock, allowing for effortless socket changes with one hand, streamlining workflow and reducing downtime. The ergonomic handle is contoured for optimal palm fit, minimizing strain and enhancing control. Our unique TorqueGuard system prevents accidental adjustments during use, ensuring consistent results every time. These thoughtful innovations, combined with premium materials and precise engineering, make the Zava Torque Wrench the clear choice for those who refuse to compromise on quality or performance.

## **Quality Promise**

Zava stands behind every tool with an industry-leading Lifetime Performance Warranty, reflecting our commitment to enduring quality and customer satisfaction. Each torque wrench undergoes rigorous multi-stage testing and is certified to meet or exceed ISO 6789 standards for torque accuracy. We provide every customer with a personalized calibration certificate, ensuring confidence in your tool's precision from day one. Our dedicated customer support team is always available to provide expert guidance and aftercare, so you can trust Zava not only for superior products but also for unmatched peace of mind and support throughout the tool's lifetime.

## **Key Features**

- Patented micro-adjustment mechanism for ultra-precise torque settings
- Aerospace-grade,

heat-treated chrome vanadium steel construction for maximum durability • Ergonomic, anti-slip dual-material handle for superior comfort and control • Wide 10-250 Nm torque range ideal for professional and heavy-duty applications • Exclusive Quick-Release Lock for fast, one-handed socket changes • Lifetime Performance Warranty and personalized calibration certificate • TorqueGuard system to prevent accidental adjustments during operation

## Specifications

Specification	Value
Product Name	Torque Wrench 1/2-drive
SKU	HTWR000005
Category	HAND TOOLS - Wrenches
Base Price	\$0.00
Brand	Zava
Warranty	Standard Manufacturer Warranty
